Cleiton Loiola

Tech Lead | Senior Software Engineer

I am a technology leader with **20+ years** of experience and a strong background in **JavaScript** **Node.js** development on **UNIX®** based systems. I have a proven track record of delivering high-quality solutions and overseeing complex system architectures. I combine strategic thinking with hands-on technical skills to solve business problems. I am effective at building teams and leveraging emerging technologies within the JavaScript landscape to drive innovation.

WORK EXPERIENCE

Qred *Tech Lead, Stockholm, SE* — **Mar 2026 - Present**

- **Tech Lead** of the Acquisition team of 6 engineers, alongside a PM and an engineering manager. The team is the **hub for client acquisition**, working across **onboarding**, **marketing**, and **partnerships**, and owns loan and card onboarding and partner integrations. Interview and hire engineers.
- Coach developers and modernize development processes for the AI era: built **AI skills**, tooling, and **agentic workflows** for the team, shortening cycle time.
- Built **Qredibility**, an AI Slack assistant that classifies, routes, and files tickets for Customer Success requests. It targets **1 FTE of capacity recovered in 2026** from **376 requests in 10 weeks** (about **3 FTE** of senior time). CTO-sponsored.
- Standardized **error tracking** across six services with traceable error IDs, so helpdesk spots recurring errors quickly. Improved **observability** and **traceability** with structured logs, metrics, and PII masking.
- Lead the **migration of complex, distributed legacy systems**, with **incremental rollouts**, **fallbacks**, and **monitoring** to de-risk every step.

Mentimeter *Senior Software Engineer, Stockholm, SE* — **Nov 2024 - Mar 2026**

- Member of the Organic Growth Team, focused on user acquisition and engagement for a leading interactive presentation platform.
- **Led** frontend architecture and delivered the redesigned website, improving **Core Web Vitals** by a **median of 30%** across all metrics and boosting lead generation.
- Designed, ran, and analyzed **A/B tests** to improve engagement and conversion.
- Built frontend features with **React**, **Next.js**, **TypeScript**, and **Tailwind CSS**, and backend services in **Ruby** and **Node.js** on **PostgreSQL** and **Redis**, running on **AWS** behind **Cloudflare**.

SEB *Solutions Developer, Stockholm, SE* — **Nov 2023 - Nov 2024**

- **Led** frontend development of the Pension and Insurance application inside the SEB banking website.
- Helped plan the migration from **Angular** to **React** and built responsive interfaces in both.
- Shipped through **Azure DevOps** CI/CD, containerized with **Docker** on **OpenShift** and **Kubernetes**.

Klarna *Senior Frontend Developer, Stockholm, SE* — **Mar 2021 - Nov 2023**

- Built scalable frontend applications with **React** and **Redux**.
- Ran performance tests and shipped fixes that kept systems stable through peak shopping seasons.
- Built **Jenkins** pipelines and internal tools, wrote system documentation, and mentored new developers.

Resultados Digitais *Frontend Specialist, São Paulo, BR* — **2019 - 2021**

- **Led** the Frontend Platform Team that broke the application monolith into **micro-frontends**.
- Authored **Front Hub**, a complete micro-frontend framework and CLI, and drove its adoption across 5+ teams and almost **100 micro-frontends**. It is still in use, now powering **500+**.
- Delivered its shared building blocks: publishing, caching, localization, design system, QA, performance, authorization, rollout, feature flags, and legacy interop.

Lendico Brasil / Provu *Senior, then Lead Frontend Engineer, São Paulo, BR* **2017 - 2019**

- Promoted to Lead in 2018: set priorities with the scrum team, led code reviews, and interviewed candidates.
- Designed the client-side architecture on **React**, **Redux**, and **Redux Saga**, and led the migration off legacy **Angular**.
- Built **A/B** and **multivariate testing**, and cut bundle size and load time with **Webpack** optimizations and CI automation.

Anapro / Onway Tecnologia *Full Stack Engineer, São Paulo, BR* **2010 - 2017**

- Built web applications for construction industry clients, owning APIs, integrations, and client/server architecture.
- Worked with **AngularJS**, **TypeScript**, **ASP.NET MVC**, **Web API**, **SignalR**, **Azure**, **Ionic**, and **Node.js**.

Earlier experience *.NET Web Developer and IT Support, Brasília, BR* **2004 - 2010**

- Built **ASP.NET** applications at Poliedro, Bancorbras, and Cobra Tecnologia, after starting in IT support.

SKILLS

- **Technical:** JavaScript, TypeScript, Node.js, React, Next.js, Docker, Kubernetes, AWS, PostgreSQL, Git/GitHub, GNU/Linux.
- **Hobbies:** Rust, C, and embedded systems.
- **Side projects:** wrote **Hi New Scrap**, a Firefox userscript that alerted Orkut users to new messages, with **50,000+ users** and coverage in Superinteressante magazine. In 2010 wrote **Ceifadeira Feliz**, an automation bot for the Orkut game Colheita Feliz, which passed **12,000+ registered users**.
- **Languages:** Portuguese - Native, English - Working proficiency.

CERTIFICATIONS

- Ultimate Rust 2: Intermediate Concepts
- Linear Algebra - Foundations to Frontiers
- Creating A Chip-8 Emulator In C

HONORS-AWARDS

- **Awarded Winner of Hackathon Viva Real 2015**, a real estate technology hackathon in Brazil promoted by Viva Real, a leading online real estate marketplace.
